

Approved Uses of Corr-Ze Surface Preparation products with Carboline Coatings

Carboline can approve the use of Corr-Ze series surface prep products with Carboline coating systems provided that:

- The Corr-Ze product is used as directed by the Corr-Ze Product Data Sheet
- The Carboline coating system must be an Organic coating system (similar, but not limited to: Carbomastic 15, Carboguard 890, and/or Carbothane 134 (series))
- The coating system is for atmospheric exposure ONLY. This surface prep is NOT permitted for tank linings nor immersion service of any type at this time

Please let us know if we can be of further assistance. Thank you for choosing Carboline.
